

LOGISTICS, PURCHASING & SUPPLY

Area of Study	Logistics, Purchasing and Supply
Description	Over the last few years, the areas of logistics, purchasing and supply have received a lot of attention and rightly so. For many organisations purchasing can run into the hundreds of millions and consequently requires trained professionals. Ensuring that an organisation has the right stock of raw material or finished products at any time without overstocking, is more than just an art, it is also a science. The efficient distribution of products to customers in a cost effective manner is a complex activity in today's world where organisations are not resident in any one country.
