

Course:	Designing Spaces – an Introduction to Interior Design
Guided Learning Hours:	21 hours
Pre-requisite:	None

Abstract

Form and function are the backbone of any successful interior design. Interior designers rely upon many resources including industry design standards, codes and professional ethics to execute captivating, contextual designs that bring enormous value to their clients.

This interior design course will allow you to gain a better understanding of the elements of Interior Design and expose you to this as a profession. You will gain an understanding of the design process and the major principles of design. Learners will also have the opportunity to engage with real life examples and understand what it takes to design a project.

Target Audience

This course is designed for persons interested in the field of interior design, event managers, real estate agents, contractors, property managers, creative persons looking to change careers or to enhance their skillset and persons in professions where spatial design would be an asset or requirement.

Learning outcomes

On completion of this course, learners will be able to:

- Understand the Design process
- Understand and be exposed to the Design Elements
- Understand the principles of Design
- Understanding Space
- Effectively communicate the Design intent
